Subject index

Volume 95 (1998)

Aldehydes; Lipid peroxidation; Linoleic acid peroxidation; Hydroxy acids; Epoxides; Mass spectrometry; Atherosclerosis; Antioxidants **95**, 105

Antioxidants; Lipid peroxidation; Linoleic acid peroxidation; Hydroxy acids; Epoxides; Aldehydes; Mass spectrometry; Atherosclerosis **95**, 105

Antioxidant synergism; Low density lipoprotein; Lipophilic vitamin C; Vitamin E **95**, 49

Area per lipid; Lipid bilayers; Osmotic pressure; Fluctuations, Synchrotron X-ray diffraction **95**, 83

Atherosclerosis; Lipid peroxidation; Linoleic acid peroxidation; Hydroxy acids; Epoxides; Aldehydes; Mass spectrometry; Antioxidants **95**, 105

Calcium chloride; Lipid phase transitions; Differential scanning calorimetry; Sodium chloride **95**, 163

Cholesterol; Cholesterol sulfate; Docosahexaenoic acid; Differential scanning calorimetry; Lipid bilayers **95**, 23

Cholesterol sulfate; Cholesterol; Docosahexaenoic acid; Differential scanning calorimetry; Lipid bilayers **95**, 23

***Cis–trans* isomerization**; 12-(*S*)-Hydroxyheptadecatrienoic acid (HHT); High-performance liquid chromatography; Gas chromatography-mass spectrometry **95**, 181

Cooperative units; Glycolipids; Phase transitions; DSC; DSD; X-ray scattering; Enthalpy **95**, 59

Cubic phase; Frictional heating; Homogeneity; Hydrated lipids; Metastability; Mixing device **95**, 11

Cutinase; Interfacial binding; Oil drop tensiometer; Triolein hydrolysis; Oleic acid diffusion; Qualitative model **95**, 169

Differential scanning calorimetry; Cholesterol sulfate; Cholesterol; Docosahexaenoic acid; Lipid bilayers **95**, 23

Differential scanning calorimetry; Lipid phase transitions; Sodium chloride; Calcium chloride **95**, 163

Docosahexaenoic acid; Cholesterol sulfate; Cholesterol; Differential scanning calorimetry; Lipid bilayers **95**, 23

DSC; Fluconazole; Model Membranes; X-ray diffraction; Transmission Electron Microscopy; Fluorescence **95**, 37

DSC; Glycolipids; Phase transitions; DSD; X-ray scattering; Enthalpy; Cooperative units **95**, 59

DSD; Glycolipids; Phase transitions; DSC; X-ray scattering; Enthalpy; Cooperative units **95**, 59

Enthalpy; Glycolipids; Phase transitions; DSC; DSD; X-ray scattering; Cooperative units **95**, 59

Epoxides; Lipid peroxidation; Linoleic acid peroxidation; Hydroxy acids; Aldehydes; Mass spectrometry; Atherosclerosis; Antioxidants **95**, 105

Fluconazole; Model Membranes; DSC; X-ray diffraction; Transmission Electron Microscopy; Fluorescence **95**, 37

Fluctuations, Synchrotron X-ray diffraction; Lipid bilayers; Osmotic pressure; Area per lipid **95**, 83

Fluorescence; Fluconazole; Model Membranes; DSC; X-ray diffraction; Transmission Electron Microscopy **95**, 37

Frictional heating; Cubic phase; Homogeneity; Hydrated lipids; Metastability; Mixing device **95**, 11

Gas chromatography-mass spectrometry; 12-(*S*)-Hydroxyheptadecatrienoic acid (HHT); *Cis–trans* isomerization; High-performance liquid chromatography **95**, 181

PII S0009-3084(98)00095-4

Glycolipids; Phase transitions; DSC; DSD; X-ray scattering; Enthalpy; Cooperative units **95**, 59

Head-group; Olfactory sensor; Interdigital electrode; Hydrocarbon chain; Voltage response **95**, 1

High-performance liquid chromatography; 12-(S)-Hydroxyheptadecatrienoic acid (HHT); *Cis–trans* isomerization; Gas chromatography-mass spectrometry **95**, 181

Homogeneity; Cubic phase; Frictional heating; Hydrated lipids; Metastability; Mixing device **95**, 11

Hydrated lipids; Cubic phase; Frictional heating; Homogeneity; Metastability; Mixing device **95**, 11

Hydrocarbon chain; Olfactory sensor; Interdigital electrode; Head-group; Voltage response **95**, 1

Hydroxy acids; Lipid peroxidation; Linoleic acid peroxidation; Epoxides; Aldehydes; Mass spectrometry; Atherosclerosis; Antioxidants **95**, 105

Impedance spectroscopy; Melittin; Quartz crystal microbalance; Solid-supported lipid bilayers **95**, 95

Interdigital electrode; Olfactory sensor; Hydrocarbon chain; Head-group; Voltage response **95**, 1

Interfacial binding; Cutinase; Oil drop tensiometer; Triolein hydrolysis; Oleic acid diffusion; Qualitative model **95**, 169

Linoleic acid peroxidation; Lipid peroxidation; Hydroxy acids; Epoxides; Aldehydes; Mass spectrometry; Atherosclerosis; Antioxidants **95**, 105

Lipid bilayers; Cholesterol sulfate; Cholesterol; Docosahexaenoic acid; Differential scanning calorimetry **95**, 23

Lipid bilayers; Osmotic pressure; Area per lipid; Fluctuations, Synchrotron X-ray diffraction **95**, 83

Lipid peroxidation; Linoleic acid peroxidation; Hydroxy acids; Epoxides; Aldehydes; Mass spectrometry; Atherosclerosis; Antioxidants **95**, 105

Lipid phase transitions; Differential scanning calorimetry; Sodium chloride; Calcium chloride **95**, 163

Lipophilic vitamin C; Low density lipoprotein; Antioxidant synergism; Vitamin E **95**, 49

Low density lipoprotein; Antioxidant synergism; Lipophilic vitamin C; Vitamin E **95**, 49

Mass spectrometry; Lipid peroxidation; Linoleic acid peroxidation; Hydroxy acids; Epoxides; Aldehydes; Atherosclerosis; Antioxidants **95**, 105

Melittin; Impedance spectroscopy; Quartz crystal microbalance; Solid-supported lipid bilayers **95**, 95

Metastability; Cubic phase; Frictional heating; Homogeneity; Hydrated lipids; Mixing device **95**, 11

Mixing device; Cubic phase; Frictional heating; Homogeneity; Hydrated lipids; Metastability **95**, 11

Model Membranes; Fluconazole; DSC; X-ray diffraction; Transmission Electron Microscopy; Fluorescence **95**, 37

Oil drop tensiometer; Interfacial binding; Cutinase; Triolein hydrolysis; Oleic acid diffusion; Qualitative model **95**, 169

Oleic acid diffusion; Interfacial binding; Cutinase; Oil drop tensiometer; Triolein hydrolysis; Qualitative model **95**, 169

Olfactory sensor; Interdigital electrode; Hydrocarbon chain; Head-group; Voltage response **95**, 1

Osmotic pressure; Lipid bilayers; Area per lipid; Fluctuations, Synchrotron X-ray diffraction **95**, 83

Phase transitions; Glycolipids; DSC; DSD; X-ray scattering; Enthalpy; Cooperative units **95**, 59

Qualitative model; Interfacial binding; Cutinase; Oil drop tensiometer; Triolein hydrolysis; Oleic acid diffusion **95**, 169

Quartz crystal microbalance; Impedance spectroscopy; Melittin; Solid-supported lipid bilayers **95**, 95

12-(S)-Hydroxyheptadecatrienoic acid (HHT); *Cis–trans* isomerization; High-performance liquid chromatography; Gas chromatography-mass spectrometry **95**, 181

Sodium chloride; Lipid phase transitions; Differential scanning calorimetry; Calcium chloride **95**, 163

Solid-supported lipid bilayers; Impedance spectroscopy; Melittin; Quartz crystal microbalance **95**, 95

Transmission Electron Microscopy; Fluconazole; Model Membranes; DSC; X-ray diffraction; Fluorescence **95**, 37

Triolein hydrolysis; Interfacial binding; Cutinase; Oil drop tensiometer; Oleic acid diffusion; Qualitative model **95**, 169

Vitamin E; Low density lipoprotein; Antioxidant synergism; Lipophilic vitamin C **95**, 49

Voltage response; Olfactory sensor; Interdigital electrode; Hydrocarbon chain; Head-group **95**, 1

X-ray diffraction; Fluconazole; Model Membranes; DSC; Transmission Electron Microscopy; Fluorescence **95**, 37

X-ray scattering; Glycolipids; Phase transitions; DSC; DSD; Enthalpy; Cooperative units **95**, 59
